How do digital tickets work?

Digital tickets not only contain all functional and operational requirements such as seat details, barcodes and entry details. All Adelaide International patrons attending the event are encouraged to assign each ticket to a ticketholder using Ticket forwarding option.

How does ticket forwarding work?

You can securely forward your ticket(s) from your mobile device or computer via your Ticketmaster MyAccount. Click the 'Forward' button, enter each recipient's details and hit send.

Each recipient will receive an email and a text message. The forwarding process is complete once they have clicked 'Accept Tickets'. If plans change and you need to forward it onto someone else, just follow the process again. Those receiving a forwarded ticket must have a Ticketmaster MyAccount. If they do not have an account, they can easily create one when they accept the tickets. Please note, there will be a delay on Ticket Forwarding prior to the event. All ticket holders will be notified when the Ticket Forwarding feature is enabled.

Before the event, make sure all adults have their own ticket on their own phone – that way we can ensure physical distancing and reduce queues at the entry gates.

Why is there a queue on the Ticketmaster Website?

It's to ensure the fairest possible purchase experience for all fans and to keep out the bots for added ticket security. Previously, everyone entered the shopping experience at once. Since automated bots are faster than a real, human fan, they can scoop up tickets before fans are able to shop and checkout. This results in tickets being sold out in a matter of minutes. With Smart Queue, we manage the flow of traffic into the shopping experience while simultaneously detecting bots and reducing their access. This gives you a fairer chance since you're only competing against other real, human fans for the same seats. For more information on how the Ticketmaster Queue works visit: <https://help.ticketmaster.com.au/hc/en-au/articles/360013625577-Ticketmaster-s-Smart-Queue>
